👤 ABOUT ME

Software developer who enjoys building things and bringing ideas to life through code. My main focus is frontend development with React, Next.js, and TypeScript, while staying comfortable working with backend systems when needed. I care about writing clean, well-structured, and maintainable code, and enjoy improving the way software is built.

📁 EXPERIENCE

●

Bina EPC

Software Developer

2024 - Present
Full-time

- Built an internal operations dashboard used by 237 employees for authentication, ticket management, forms, contacts, monitoring, and administrative workflows.
- Developed the platform with Next.js, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL, LDAP authentication, and JWT authorization.
- Owned the project end-to-end, from architecture and database design to frontend, backend, and deployment.
- Redesigned and rebuilt an earlier Django-based version that I had previously developed, improving maintainability and long-term scalability.
- Worked directly with users to gather requirements and turn operational needs into practical software solutions.
- Supported general IT operations.

📁 PROJECTS

E-Commerce Platform

Full-stack e-commerce application featuring authentication, product management, shopping cart, checkout, and order workflows.

Next.js • TypeScript • Node • PostgreSQL

Internal Operations Dashboard

Production internal platform for user management, tickets, monitoring, roles, and company operations.

Next.js • TypeScript • Node • PostgreSQL

Interactive Portfolio

Interactive developer portfolio featuring a custom terminal, project explorer, theme controls, and handcrafted UI interactions.

Next.js • TypeScript • Tailwind CSS

🎓 EDUCATION

●

B.Sc. Computer Engineering

Khatam University

2024 – 2028
Expected Graduation
